I have always been and remain an unabashed fan of Michael Sullivan as a teacher and author. He is completely careful in his explanations at the appropriate level of rigor for the audience of all his books. His illustrative examples, which are many for each topic, are very clear and very detailed. Homework and problems are all good for text on each topic. His writing style is easy to follow and a pleasure to read. Other authors that I would recommend very highly are Larson and Edwards and Thomas and Finney.
