Excellent introduction to aerodynamics not only for fans of flight models, but also for those who are engaged in full-scale light and ultralight aircraft and sailboats, remotely piloted surveillance and research aircraft, wind power and ground yachts, as well as designers of wind turbines. Revised and updated to reflect significant changes in aircraft model. 4th o.p. Sftbd., 7 1/2 x 9 1/4, 344 pgs., 306 BWH bad.
